

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Allianz Global Investors Fund - Allianz Dynamic Commodities Share Class A (EUR)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU0542493225
WKN: A1C5F5

Objectives and Investment Policy

Risk adjusted returns through all market cycles by investing in the international equity, commodity and bond markets while participating in the performance of the Dynamic Commodities Strategy.

We manage this Sub-Fund in reference to a Benchmark. Sub-Fund's Benchmark plays a role for the Sub-Fund's performance objectives and measures. We follow an active management approach with the aim to outperform the Benchmark. Although our deviation from the investment universe, weightings and risk characteristics of the Benchmark is likely to be material in our own discretion, the minority of the Sub-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

Min. 70% of Sub-Fund assets are invested by us in bonds, Equities and/or other asset classes as described in the investment objective. Max. 30% of Sub-Fund assets may be invested by us in Equities and/or bonds and/or asset classes other than described in the investment objective. Sub-Fund assets may be invested in Emerging Markets. Sub-Fund assets may be invested by us in High-Yield bonds bearing a typically higher risk and higher potential of gains. Sub-Fund assets may not be invested by us in ABS and/or MBS. Max. 100% Sub-Fund assets may be held in deposits and/or may be invested by us directly in money market instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management

and/or defensive purpose. All bonds and money market instruments must have at the time of acquisition a rating of at least B- or a comparable rating from a recognised rating agency. Sub-Fund participates in the Dynamic Commodities Strategy which is implemented by us by using a derivate structure, in particular swaps, on a cash component and the positive or negative performance resulting from the Strategy's investment in securities. The Strategy focuses on exchange traded certificates ("ETC") which replicate the exposure to single commodities. The Strategy covers 3 commodity areas (Energy, Industrial Metals, Precious Metals).

Benchmark: BLOOMBERG Commodity Excl. Agriculture Excl. Livestock Capped Total Return (Shifted By 2 Days Forward) (in EUR).

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommendation: the Share Class of the Fund should be held for at least a medium- to long-term investment horizon.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 6 have shown in the past a high volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 6 might be subject to high price fluctuations based on the historical

volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

We may invest a significant portion of the fund into derivatives which are not traded on an exchange. If any counterparty of such derivatives may fall into insolvency or may suffer economical problems this may result in losses for the fund and/or the fund price may drop. In addition, we may not or not immediately implement comparable derivatives with new counterparties which may result in difficulties to continuously adopt the investment strategy of the fund.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

Entry Charge	5.00%
Exit Charge	0.00%

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

Ongoing Charges	1.59%
-----------------	-------

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 30.09.2021. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

You will find more details about the calculation of the charges by checking the respective part of the prospectus.

Past Performance

- Percentage growth of the fund
- Benchmark: BLOOMBERG Commodity Excl. Agriculture Excl. Livestock Capped Total Return (Shifted By 2 Days Forward) (in EUR)

Past performance is not a reliable guide to future performance.

The actual grade of deviation from the Benchmark defines the extent to which the fund's performance may outperform or underperform the Benchmark's performance.

The past performance shown here takes account of all charges

and costs with the exception of the entry, switching and exit charge.

The fund was launched in 2010. This share class was launched in 03.03.2014.

The performance of the fund is calculated in EUR.
