Dear Shareholder,

The board of directors of Amundi Funds (the “Board”) would like to inform you of the following changes:

1. Change of sub-fund name, objective, investment policy, management process, investment manager and ESG approach: Amundi Funds Japan Equity Select

With effect from 16 September 2026, the sub-fund Amundi Funds Japan Equity Select will be renamed as Amundi Funds Japan Equity Growth.

On the same date, the following changes are to occur in relation to the sub-fund to:

- increase the minimum commitment to invest in Japanese equities from 51% to 67% of net assets;
- add the possibility to invest in equity-linked instruments up to 15% of net assets;
- reflect the disclosure enhancing transparency;
- revise the expected extent of deviation from the benchmark from “significant” to “material”.

The current objective, investment policy, management process, investment manager of the sub-fund is:

“Objective

Seeks to increase the value of your investment over the recommended holding period.

Investments

The Sub-Fund is a financial product that promotes ESG characteristics pursuant to Article 8 of the Disclosure Regulation.

The Sub-Fund invests mainly in a broad range of equities of companies that are based in or do most of their business in Japan.

Whilst the investment manager aims to invest in ESG Rated securities not all investments of the Sub-Fund will have an ESG rating and in any event such investments will not be more than 10% of the Sub-Fund.

The Sub-Fund may invest up to 10% of its assets in other UCITS and UCIs.

Benchmark

The Sub-Fund is actively managed by reference to and seeks to outperform (after applicable fees) the Topix Net Total Return Index (the “Benchmark”) over the recommended holding period. The Sub-Fund is mainly exposed to the issuers of the Benchmark, however, the management of the Sub-Fund is discretionary, and will be exposed to issuers not included in the Benchmark. The Sub-Fund monitors risk exposure in relation to the Benchmark however the extent of deviation from the Benchmark is expected to be significant. The Benchmark is a broad market index, which does not assess or include its constituents according to environment characteristics and therefore is not aligned with the environmental characteristics promoted by the Sub-Fund.

Derivatives

The Sub-Fund makes use of derivatives to reduce various risks, for efficient portfolio management and as a way to gain exposure (long or short) to various assets, markets or other investment opportunities (including derivatives which focus on equities).

Management Process

The investment manager uses fundamental analysis, which aims to select equities of companies with a healthy balance sheet, attractive returns on invested capital with superior growth potential. The investment manager engages with the management of those companies in order to improve capital allocation and ESG (environmental, social and governance) practices.

Further, the Sub-Fund seeks to achieve an ESG score of its portfolio greater than that of the Benchmark.

When analysing ESG score against the Benchmark, the Sub-Fund is compared with the ESG score of its Benchmark after 20% of the lowest ESG rated securities have been excluded from the Benchmark. For more information, see the “Sustainable Investing–Taxonomy Regulation” section and the sub-fund’s ESG/sustainability annex.

Management Process

Strategy

The investment manager uses fundamental analysis to identify companies that appear to have superior long-term growth prospects (bottom-up approach).

The sub-fund is mainly exposed to the issuers of the benchmark, however, the management of the sub-fund is discretionary, and will invest in issuers not included in the benchmark. The sub-fund monitors risk exposure in relation to the benchmark however the extent of deviation from the benchmark is expected to be material.

Sustainability approach

The sub-fund integrates Sustainability Factors in its investment process and takes into account principal adverse impacts of investment decisions on Sustainability Factors as outlined in more detail in section “Sustainable Investing” of the Prospectus.

Given the sub-funds’ investment focus, the investment manager of the sub-fund does not integrate a consideration of environmentally sustainable economic activities (as prescribed in the Taxonomy Regulation) into the investment process for the sub-fund.
